IMPROVING CYBERSECURITY READINESS OF THE EUROPEAN VOCATIONAL EDUCATION AND TRAINING SECTOR

THE AIM OF CYBER.EU.VET PROJECT IS TO STRENGTHEN THE EUROPEAN VET CAPACITY TO RECOGNISE AND MANAGE CYBERSECURITY THREATS LIKE PHISHING ATTACKS, BOTNETS, FINANCIAL & BANKING FRAUDS, DATA FRAUD ETC.

IT'S BEEN 2 VERY PRODUCTIVE YEARS

After 2 productive years we are more than happy about the results: through the GameJams earlier this year some fruitful ideas took shape – see our IO2 pdf for fresh training material on cybersecurity.

Together with a whole new training manual it forms the trainer's toolkit - a valuable source to learn more about the most pressing issues around cybersecurity and how to avoid risks and threats.

Whether fresh training material, a whole toolkit and training format or our handbook on cybersecurity for the VET sector – everything is free to download from our website, cybervet.eu.

IMPROVING CYBERSECURITY READINESS OF THE EUROPEAN VOCATIONAL EDUCATION AND TRAINING SECTOR

CYBER SEC MONTH 2022!

October 2022 was European Cyber Security Awareness Month. On this occasion, each of the project partners held an event in their own country, during which they reached out to a community of VET educators and beyond, explaining the progress of their project so far and outlining the importance of cybersecurity in today's world.
