CYBER.EU.VET

IMPROVING CYBERSECURITY READINESS OF THE EUROPEAN VOCATIONAL EDUCATION AND TRAINING SECTOR

THE AIM OF CYBER.EU.VET PROJECT IS TO STRENGTHEN THE EUROPEAN VET CAPACITY TO RECOGNISE AND MANAGE CYBERSECURITY THREATS LIKE PHISHING ATTACKS, BOTNETS, FINANCIAL & BANKING FRAUDS, DATA FRAUD ETC.

WHAT HAS HAPPENED SO FAR:

As part of IO3 Training for Trainers Toolkit, partners carried out training courses 1 and 2 in their respective countries, together with keen VET educators, to better understand the challenges of teaching Cyber Security to adults, while gathering feedback for the final toolkit.

IN OUR PARTICIPANTS' WORDS

"Cybersecurity is about much more than staying safe. Since it involves being careful with what you post, and how it impacts on others, it is also about digital citizenship" - Adult educator, Ireland

INTERESTING OBSERVATIONS FROM EDUCATORS

- Cybersecurity trainings need to be adapted groups of learners with different levels of IT competences
- Adult learners are often more prone to understand cybersecurity threats if they understand how it impacts them as an individual, and not as an organization
- Cyberbullying is a growing threat to individuals of all ages, and staying safe from it requires more than just technical skill: it requires being more careful about what one does online

WHAT'S NEXT?
